First, I have to express how awesome I find your Actual Education initiative. What you're doing for these students is wonderful, and you've been a huge inspiration to me. I, myself, really enjoy helping others with their schoolwork, so much so that I'm looking to get into tutoring. When one of the kids I was working with pointed out your Discord, what you do, and how many people you help on a regular basis, it blew me away. You showed me the impact and reach of free, online tutoring, and your approach to teaching was eye-opening. I was hoping you could share with me some tips for a beginner tutor, and some insight on teaching that you've gathered over time. Thanks so much and please keep doing what you're doing!

i really appreciate going above and beyond just to help out someone you hardly know ik maybe ppl dont see it but your a great guy like fri cuz ik adults are busy yet you run a server and help anyone in need with no charge so Thanks for being here cause without you i wouldnt have anyone to really ask this type of stuff

hello! your videos are educational and entertaining at the same time, please continue doing this for students like me who prefer video lessons that are not boring
thank you very much!!
